ABOUT ME

Computer Science student specializing in AI and ML with experience in designing machine learning solutions, NLP based systems, and real-time applications. Skilled in identifying automation opportunities, building data-driven models, and integrating AI into end-to-end workflows.

EDUCATION

VIT Bhopal University

B.Tech in Computer Science, Specialization in AI and ML (CGPA: 9.16)

Bhopal, Madhya Pradesh

Sept. 2023 – May 2027

Salwan Public School

Higher Secondary Education, CBSE

Gurgaon, Haryana

April 2009 – May 2023

EXPERIENCE

AI Engineer Intern

amasQIS.ai

April 2025 – Sept. 2025

- Developed HRMS components using Express and MongoDB with real-time WebSocket updates
- Assisted in testing and validating AI models in production-like environments

Data Transformation Intern

Silverskills Pvt. Ltd.

May 2023 – July 2023

- Automated data collection using Python web scraping.
- Provided client with need based analytics of company's progression with Streamlit and Seaborn

PROJECTS

Parkinson's Disease Prediction System | Python, Bi-LSTM, Machine Learning

March 2025 - April 2025

- Engineered speech-based Parkinson's prediction model using Bi-LSTM networks with advanced acoustic feature extraction from voice signals, achieving 95%+ classification accuracy on benchmark datasets.
- Designed acoustic feature extraction pipeline using MFCC, pitch tracking, and jitter/shimmer analysis, increasing model input quality
- Implemented comprehensive evaluation pipeline with confusion matrices, ROC curves, and statistical evaluation criterias, enabling reliable deployment in clinical screening applications.

DeepCacher - A better compression method | Python, XGBoost, LZ4, ZSTD, Brotli

March 2026

- Built a lossless folder compressor beating zip, tar and other prominent models on ratio (3.7x) using zstd, lz4 and brotli along with an XGBoost model to classify files
- Engineered end-to-end for speed: parallel I/O, chunked multiprocess feature extraction, and a custom binary archive format — benchmarked against multiple others on compression speeds, sizes and decompression speeds

EduSaarthi – AI Teacher Assistant | Next.js, ReactJS, OpenAI API, MongoDB

Jan. 2026

- Built multilingual AI chat platform with English-Hindi support using Next.js, enabling seamless cross-lingual teacher-student interactions.
- Automated multilingual query handling using NLP-based conversational workflows, processing diverse language inputs with high accuracy.
- Implemented persistent chat storage and optimized UI components for low-latency interaction during live classroom sessions.

TECHNICAL SKILLS

Languages: Java, Python, C++, SQL (MySQL), MongoDB, JavaScript, HTML/CSS

Frameworks: React, Node.js, Next.js, Express.js, WebSocket, RestAPI

Developer Tools: Git, GitHub, Docker, AWS, OCI, Linux

Libraries: scikit-learn, Pandas, NumPy, TensorFlow, Matplotlib, Seaborn, BeautifulSoup

AI/ML: Machine Learning, Deep Learning, NLP, Model Evaluation, Feature Engineering, Data Pipelines

CERTIFICATION

OCI Certified Generative AI Professional (2025)

Oracle Cloud Infrastructure AI Foundations Associate (2025)

Applied Machine Learning in Python (Coursera, 2025)

Machine Learning Fundamentals (Coursera, 2024)

OCI Certified Data Science Professional (2025)

ACHIEVEMENTS

ZS Campus Beats 2026 Tech Challenge First Runner Up

Jury Special Prize winner in Sandisk Hackathon 2026

LeetCode Top 47.73% with 256 questions solved

Codeforces Rating 947
